GENERAL CHARACTERISTICS

It is the choice of those who need maximum strength and power. Queen9 is distinguished by its 900 mm depth, a 20/10-thick work surface, double-crown burners, and the use of elegant stainless steel with a Scotch Brite finish.

Details that not only offer maximum functionality and aesthetics, but also take into account the practical and ergonomic needs of those who work.

The extreme freedom of composition allows top models to be combined with accessorizable oven and neutral base units, even with hygienic finishes.

With more than 350 models immediately available in the catalog, Queen9 is already ready to start giving its best.

In addition, all equipment that makes up a Queen9 kitchen is certified in compliance with international standards, including CE, GAR, AGA and others.

TECHNICAL SPECIFICATIONS

Gas version

Stabilized flame burners regulated by thermostatic valves.

Piezoelectric ignition.

Electric version

Heated by armored heating elements placed outside the tank.

Control thermostat.

Different GN tray combinations

Examples:

M40: 1xGN1/3 + 1xGN 1/1 TANK

M80: 2xGN1/3 + 2xGN 1/1 TRAY

Adjustable temperature in tank with overflow and perforated false bottom for supporting containers. GN-sized tank.

Equipment certified for low voltage directive 2014/35/EU according to the international CB scheme.

Thanks to the jet-proofing certification (IPX5) obtained through specific tests, knobs and under-knobs can be washed at the end of the working day without compromising functionality and safety.

The front bar is a comfortable foothold for the cook; it keeps a safe distance from the worktop and thus protects against accidental collisions with what is resting on the worktops and at the same time the handles.
