GENERAL CHARACTERISTICS

From the solid foundation of Baron tradition, comes the new Queen 4.0 kitchen, even more practical, more accessorized, more technological.

An evolution in the field of professional kitchens.

Queen 4.0 is perfectly designed in detail to speed up and simplify every task of preparation, cooking, tidying up, and cleaning in the kitchen, and stand by you every day as a true ally in your work.

TECHNICAL SPECIFICATIONS

Stainless steel outer shells and feet.

Height from the work surface adjustable from 840 to 900mm.

Tops with 2 mm thickness

Tank made entirely of AISI 304 steel.

Heating is achieved by means of armoured heating elements placed under the bottom of the tank.

The temperature, thermostatically controlled, is adjustable from 50 to 300°C.

Equipment certified for low voltage directive 2014/35/EU according to the international CB scheme.

Thanks to the jet-proofing certification (IPX5) obtained through specific tests, knobs and under-knobs can be washed at the end of the working day without compromising functionality and safety.

The front bar is a comfortable foothold for the cook; it keeps a safe distance from the worktop and thus protects against accidental collisions with what is resting on the worktops and at the same time the handles.
