GENERAL CHARACTERISTICS

It is the choice of those who need maximum strength and power. Queen9 is distinguished by its 900 mm depth, a 20/10-thick work surface, double-crown burners, and the use of elegant stainless steel with a Scotch Brite finish.

Details that not only offer maximum functionality and aesthetics, but also take into account the practical and ergonomic needs of those who work.

The extreme freedom of composition allows top models to be combined with accessorizable oven and neutral base units, even with hygienic finishes.

With more than 350 models immediately available in the catalog, Queen9 is already ready to start giving its best.

In addition, all equipment that makes up a Queen9 kitchen is certified in compliance with international standards, including CE, GAR, AGA and others.

TECHNICAL SPECIFICATIONS

Unbreakable watertight glass-ceramic top.

Cooking zones marked with 27x27 cm square silkscreen printing.

4 kw single zone power.

Temperature regulation from 70-450°C by thermostat.

Heating activation light and residual heat indicator light.

Electric oven

Groups of stainless steel heating elements placed on the ceiling and under the sole of the firing chamber.

Thermostatic temperature control in the chamber from 100°C to 300°C.

Warning light indicating "equipment under voltage."

Indicator light indicating that the set temperature has been reached.

A temperature regulator sets the temperature and this permits to select two sizes of the heating zone according to the size of the pot bottom.

Firing surface temperature 70° to 450° C

Thanks to the jet-proofing certification (IPX5) obtained through specific tests, knobs and under-knobs can be washed at the end of the working day without compromising functionality and safety.

The front bar is a comfortable foothold for the cook; it keeps a safe distance from the worktop and thus protects against accidental collisions with what is resting on the worktops and at the same time the handles.
