GENERAL CHARACTERISTICS

The Giano pass-through Series appliances are characterized by their great versatility, the perfect combination of modules, and their robustness, thanks to 2 mm thick laser-cut AISI 304 cooking surfaces.

These peculiarities make it possible to make firing blocks according to specific customer requirements.

Reliability and high efficiency are ensured by the use of tested components and the high efficiency of the heating elements used.

Support bases can be equipped with pass-through ovens, ventilated hot cabinets, neutral, or cantilevered or bridged.

Machines all complying with CE regulations.

RAL paint treatment can be requested.

TECHNICAL SPECIFICATIONS

Adjustment of power output to 6 positions.

1 cooking zone in 45x110 module and 2 cooking zones on 90x110 module.

Indicator light for signaling live equipment.

Removable bowl located under the grill for collecting cooking liquids, easily removable for cleaning.

Firing effected by contact directly on the heating element assembly.
