GENERAL CHARACTERISTICS

A line of small-sized cooking equipment designed for those who, even in small spaces, do not want to give up great performance. Made of AISI 304 18/10 stainless steel, finely finished with Scotch Brite satin finish, it has rounded edges and large capacity enclosures; it has 600/650 mm depth and modular width of 400/600/700/800/1000 mm; the series is completed by open, armored or refrigerated base supports.

The equipment is easily modular to one another until it forms a compact, gap-free whole thanks to a leak-covering profile that provides protection against leakage and thus maximum hygiene. High chimneys, ergonomic knobs mounted on a sloping dashboard for easy visibility, give the range ease of use from the first approach.

All models are CE approved.

TECHNICAL SPECIFICATIONS

The range allows a choice between the two gas models modulo 400 and modulo 600.

The rod cooking grid is suitable for cooking fish.

A grill for cooking meat can be provided upon request.

The work surface, equipped with splash guard edges, is slightly inclined so as to channel sauces, fats and condiments, into the special drip pan.

Pilot flame, thermocouple, piezoelectric ignition and valved faucet ensure maximum safety.

The steel burner is easily removed for cleaning.
