GENERAL CHARACTERISTICS

A line of small-sized cooking equipment designed for those who, even in small spaces, do not want to give up great performance. Made of AISI 304 18/10 stainless steel, finely finished with Scotch Brite satin finish, it has rounded edges and large capacity enclosures; it has 600/650 mm depth and modular width of 400/600/700/800/1000 mm; the series is completed by open, armored or refrigerated base supports.

The equipment is easily modular to one another until it forms a compact, gap-free whole thanks to a leak-covering profile that provides protection against leakage and thus maximum hygiene. High chimneys, ergonomic knobs mounted on a sloping dashboard for easy visibility, give the range ease of use from the first approach.

All models are CE approved.

TECHNICAL SPECIFICATIONS

Induction cookers are available with 1 or 2 zones (diam 220 mm) of cooking and in WOK version (diam 300 mm) for a power of 5kW per zone.

The equipment is equipped with pot presence detector device and operation indicator light.

A device detects the presence of the pan and activates the heating; in the event of abnormal use, however, a special overheating protection device blocks the operation.

PRODUCT'S RANGE PLUS

The cooking zones are marked with a circular silkscreen printing with a diameter of 22 cm (30 cm for the wok), for a power of 5 kW per zone.

A device detects the presence of the pan and activates the heating; in the event of abnormal use, however, a special overheating protection device blocks the operation.
