SERIE
BARON 4.0

GENERAL CHARACTERISTICS

From the solid foundation of Baron tradition, comes the new Queen 4.0 kitchen, even more practical, more accessorized, more technological.

An evolution in the field of professional kitchens.

Queen 4.0 is perfectly designed in detail to speed up and simplify every task of preparation, cooking, tidying up, and cleaning in the kitchen, and stand by you every day as a true ally in your work.

TECHNICAL SPECIFICATIONS

Unbreakable watertight glass-ceramic top.
Cooking zones marked with 27x27 cm square silkscreen printing.
4 kw single zone power.
Temperature regulation from 70-450°C by thermostat.
Possibility of setting 2 timers to control cooking.
An acoustic signal alerts the operator at the end of the set time.

A temperature regulator sets the temperature and this permits to select two sizes of the heating zone according to the size of the pot bottom.

Firing surface temperature 70° to 450° C

Data collection, operation monitoring, remote control are just some of the possibilities that connectivity puts at your disposal.

Thanks to the jet-proofing certification (IPX5) obtained through specific tests, knobs and under-knobs can be washed at the end of the working day without compromising functionality and safety.

The front bar is a comfortable foothold for the cook; it keeps a safe distance from the worktop and thus protects against accidental collisions with what is resting on the worktops and at the same time the handles.
